NOTE Download All Your Support Materials and Tools in One Place

1. Go to: <http://www.digital-watchdog.com/support-download/>
2. Search your product by entering the part number in the '**Search by Product**' search bar. Results for applicable part numbers will populate automatically based on the part number you enter.
3. Click '**Search**'. All supported materials, including manuals, Quick Start Guides (QSG), software and firmware will appear in the results.

Attention: This document is intended to serve as a quick reference for initial set-up.

It is recommended that the user read the entire instruction manual for complete and proper installation and usage.

INSTALLING THE MOUNTING ACCESSORY

Attach the wall mount bracket to the structure using the tapping screw (PLASTIC ANCHOR, PTS1 M6x40L) as illustrated in the figure. The wall mount bracket must be attached to a structure such as hardwood, wall stud, concrete or a suitable material capable of supporting the final mount assembly. The installer may need to change the method of mounting or hardware used depending on the wall material. Use the machine screw to align the wall mount bracket holes to turret camera housing holes.

TURRET CAMERA INSTALLATION WITH WALL MOUNT BRACKET

Separate the wall mount from the mounting template.

Attach the camera to the wall mount using the screws included with the camera.

Use the mount's template to mark and drill the necessary holes in the wall.

Pull wires through and make all necessary connections.

Connect the wall mount to the mounting bracket until secured. Use the small screw at the bottom of the wall mount to complete the installation.
