

## OPTION 1 Network Configuration Using the NVR's Local PoE Switch and an 8-Port PoE Switch

- Cameras connected directly to the NVR do not need a separate power supply or any additional networking configuration. The NVR will set up all the proper settings automatically.
- Using this network configuration allows for up to 15 cameras to be connected to the NVR.

## OPTION 2 Network Configuration Using the NVR's Local PoE Switch and a 16-Port PoE Switch

- Cameras connected directly to the NVR do not need a separate power supply or any additional networking configuration. The NVR will set up all the proper settings automatically.
- Using this network configuration allows for up to 16 cameras, with 7 IP cameras connected to the NVR and 9 IP cameras connected to the separate PoE Switch (the NVR's max number of cameras is 16).

## OPTION 3 Network Configuration Using the NVR's Local PoE Switch and an 8-Port PoE Switch

- Cameras connected to the 8-port PoE switch need separate and additional networking configuration according to the router and network settings. Please contact your Network Administrator for additional information and proper IP setup.
- Using this network configuration allows for up to 8 cameras to be connected to the 8-port PoE switch.
